INTERNSHIP EXPERIENCE

Software Developer Intern | MindMatrix, Bengaluru, India

Feb 2026 – May 2026

- Built Namma-Shaale, a frontend-only React application for school asset management, with 4 modules, asset registration, health checks, issue tracking, and sharing, using reusable components and client-side routing.
- Implemented CRUD workflows and state management entirely on the frontend, handling data creation, updates, and display across all four modules without a backend or persistent database.
- Diagnosed and resolved 4 categories of bugs, a counter stuck at zero, incorrect counter increments, visual/UI inconsistencies, and state/data update issues, through systematic testing, resulting in consistent and reliable application behavior.

PROJECTS

QuickDine | Full-Stack Multi-Restaurant Booking Platform

React.js, TypeScript, Node.js, Express.js, MongoDB, Tailwind CSS

- Architected a full-stack booking platform with role-based dashboards for customers, restaurant owners, and admins.
- Implemented 18 REST API endpoints for authentication, reservations, and admin workflows; secured private routes with JWT and HTTP-only cookies for role-based access control.
- Integrated Cloudinary and Multer for image uploads and designed MongoDB schemas with validation and optimized queries; deployed to production on Vercel.

MERN Authentication System | Secure Auth & Account Recovery

React.js, Node.js, Express.js, MongoDB, Nodemailer

- Engineered a secure authentication system supporting registration, login, email verification, and password reset workflows.
- Implemented JWT-based authentication with HTTP-only cookies and middleware to protect private API routes and user sessions.
- Built OTP-based email verification and password reset flows using Nodemailer and Brevo SMTP with secure OTP generation and expiration handling.

E-Commerce Platform | Full-Stack Shopping Experience

React.js, Node.js, Express.js, Vitest

- Built a full-stack e-commerce application for product browsing, cart management, and order workflows.
- Developed RESTful APIs for product, cart, and user operations, maintaining accurate real-time cart synchronization.
- Wrote unit and component tests with Vitest to improve application reliability and UI consistency.

Crypto Price Tracker | Real-Time Cryptocurrency Dashboard

React.js, Vite, CoinGecko API

- Created a responsive cryptocurrency tracking app displaying live market data, coin details, and price trends via the CoinGecko API.
- Built search, filtering, and sorting features alongside interactive 7-day price charts for market analysis.

EDUCATION

Bachelor of Technology (B.Tech), Information Science & Engineering

2022 – 2026

KNS Institute of Technology, Bengaluru, Karnataka

LANGUAGES & TECHNOLOGIES

Languages: JavaScript, TypeScript, HTML, CSS

Frontend: React.js, React Router, Context API, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Databases: MongoDB, Mongoose, MySQL, Database Design

Tools: Git, GitHub, Postman, Vite, Vercel

INTERESTS

Chess • Guitar • Gaming
